ZAC ANGER

Developer &
Musician

PROJECTS ▼

2016   **create-repo**
Node
Command-line tool to create a new repo locally and on GitHub
from info in your package.json, from init to push.

2016   **dolog**
Node
Node module that easily enables turning console.log on and
off.

2016   **hipper**
Node
Text editor for the terminal.

2016   **lilnote**
Node
Tiny note-taking utility that saves in JSON.

2016   **scrapegh**
Node
Command-line tool for scraping GitHub.

2016   **luvi**
Node
Dev server with nifty extras and simple, easy config and
API.

2016   **Pharaoh**
React/Node
An educational tool for live code broadcasting. Front-end in
React, with an executable desktop app installable from NPM,
running on NW.js.

2016   **scrapingnode**

Node

A tiny web scraper in Node, installable from NPM.

2015   **ayuba**

Node/Angular

A desktop Markdown editor with real-time preview and MongoDB storage.

2015   **markvi**

Angular

An in-browser Markdown editor written in Angular, with real-time rendering.

2015   **Pengins**

Node

A tiny, fun script to give you penguins in your terminal.

EXPERIENCE

▼
